ABOUT ME

I have experience building and designing software. Currently I love working on web applications using technologies like React, style-component, MUI | Material-ui, Next JS, Tailwind, Django, Express and more.

WORK EXPERIENCE

● Administrative Assistant

Lotería del Táchira (1 month)

● Independent teacher

Mathematics, physics, English

PROJECTS

● Twelve Frotend Projects

In the portfolio presented in the contact sidebar section: there is my portfolio containing various projects, mostly frotend. heavily focused on reactjs and other tools

● web-clone-udemy

this project was carried out in frontend to simulate a website for sales of udemy courses, it has pagination and a shopping cart, the web design in CSS with styled-components

● Chat SOCKEIO

It is a chat with typescript that uses express and react for its development

● eCommerce Nike Store

This Nike Store eCommerce project is designed in React, Sass, Inline CSS, JavaScript, and Ajax. You can use JavaScript functionality to interact with the server in real time and Ajax functionality to update data in real time
